You won't see the **Cutera Xeo non-ablative laser beam** at the local nail emporium. Used in Dr. Colbert's *Medicare* (\$450; 119 Fifth Ave., at 19th St., 4th fl.; 212-533-8888), it's supposed to stimulate collagen on the feet. If that's too subtle, they're also sandblasted with microdermabrasion, which removes three layers of outer skin.
